ATON™ Taps AVAD as New Distribution Partner

*ATON's Full Line of Intelligent Signal Processing and Routing Equipment
Now Available to AVAD's North American Network of More than 9000 Dealers*

LEXINGTON, KY — ATON™, a premier manufacturer of high-end, affordable home audio and video signal routing products for the custom installer market, announced the company's first major distribution agreement for its state-of-the-future routing products. Starting immediately AVAD LLC, of Van Nuys, California, will distribute the company's full line of Dynamic Level Adjustment (DLA) Speaker Level Audio Routers. As ATON's distribution partner, AVAD will be providing access to ATON products to the more than 9000 whole home dealers throughout their network of 38 U.S. and Canadian distribution centers. The Announcement was made by Bob Williams, ATON's General Manager.

Under the new agreement AVAD will handle distribution for ATON's DLA Speaker Level Audio Router line. Comprised of four models, the line includes the two-room DLA2, two-room with radio frequency (RF) control DLA2RF, four-room DLA4, and six-room DLA6. AVAD is expected to add ATON's new Digital & Analog Line Level Audio Routers and Hi-Def Video Level Routers beginning summer 2008. These products have been developed from the ground up as high-end, yet affordable and easy to install centers and carry MSRP's ranging from \$299 to \$499.

ATON's DLA Routers provide system control options that rival those of high-end custom audio systems. DLA Technology gives the user control of audio in each room using a convenient RF remote, in-wall touchpad, infrared (IR) receiver, or the front panel of the router. The RF remote adjusts volume and mute status, selects a customizable "sound scene," and turns all rooms on or off from up to 200 feet away. And in-wall touchpads and IR receivers control the DLA Router and connected audio components such as A/V receivers, CD players and more.

"ATON is a young company in an explosive growth mode," said Mr. Williams. "This agreement offers us incredible reach for the whole home products we have had in development since our start-up in late 2005. The distribution deal starts with our patent-pending intelligent speaker level router line that delivers impedance-matched audio signals at just the right power levels to up to six rooms. Our current products provide state-of-the-art audio signals while protecting expensive systems from overload, and bring the worlds first IR and RF control to systems through IR remotes and options that extend control an astounding 200 feet from the base station through RF."

"Adding ATON's patent-pending DLA technology products to our catalogue represents a major win for us and the dealers we serve," said Bob Gartland, AVAD's president. "We can now offer our dealers out-of-the box solutions that can efficiently and affordably bring up to six rooms on-line with optimized power management and circuit protection. We are now distributing ATON's full line of DLA Audio Routers and look forward to adding their eagerly anticipated DIGI5 Digital Line Level Audio Routers and Hi-Def Video Level Routers beginning this summer."

About ATON:

ATON products are designed using multiple control and distribution technologies to provide easy-to-install systems that route, control and deliver audio and video content throughout the home. The company's core technologies include Dynamic Level Adjustment (DLA), Radio Frequency (RF), Infrared (IR), and Category 5 (Cat5) digital distribution of audio and video. Organized in late 2005 as a development group, the company has been working on key products aimed at providing innovative, affordable systems for consumers. ATON, a Division of ELAN Home Systems, LLC, is based in Lexington, Kentucky, and sells through a distribution network to custom installers. To learn more, visit <http://www.atonhome.com>

About AVAD, LLC:

AVAD, LLC, a wholly-owned subsidiary of Ingram Micro, Inc., is the most complete home integration solutions provider in the United States. Its in-depth technology offering of the most trusted brands and progressive continuing education programs provide all the support necessary to design and implement complete home electronic systems solutions. AVAD stocks products for home theater, lighting controls, distributed audio/video, central vacuum and more.
